

Liberty Utilities®

As a business owner, you're always looking for ways to run your business more efficiently.

And Liberty Utilities is looking for ways to help our customers be more energy efficient.

Why don't we help each other?

Free Energy Audit. Our energy expert will visit your place of business to conduct a thorough energy audit and provide you with recommendations for you to reduce your energy use and provide suggestions for cost effective energy efficient retrofits and upgrades specific to your business. And, you may receive free CFL (compact fluorescent lights) or other measures that can be installed to start saving energy and money that day! Call 1-800-782-2506 to request an audit.

Retrofit Rebate. Commercial customers who retrofit with energy efficient lighting or install other upgrades that permanently save energy can receive incentives for such improvements in addition to achieving monthly energy and money savings on their bills. Liberty Utilities can assist you with incentives based on your specific project plans. Call 1-775-336-1300, ext. 107 *before* you start your project to find out more and to apply for an incentive.

Got Questions? We've Got Answers!

Q. *How long does it take to get an energy audit scheduled?*

A. Typically we schedule your audit at your convenience within four weeks from your request.

Q. *What kind of free CFLs does Liberty Utilities offer?*

A. We have nine different CFL models to fit many different needs. Our auditor will determine which works best for your business needs.

Q. *What types of retrofits/upgrades are eligible for a rebate?*

A. There are many different energy efficient upgrades that customers can install that can save energy and money depending upon the specific type of business and energy needs. Most electrical energy saving upgrades are eligible for an incentive with some limitations; projects may include the upgrade of lighting, kitchen fixtures, motors, control systems, heating and cooling systems just to name a few. That's why it's so important to work with Liberty *before* you begin any improvements to ensure your changes qualify for an incentive and to ensure incentives are available for your project work.

Q. *How much is the rebate?*

A. Each individual rebate is dependent on the specific type of retrofit/upgrade and several other criteria. Liberty's energy efficiency team will work directly with our commercial customers to assist them with this incentive process.

Local and Responsive. We Care.
